

Did you know...?

A recent AMA Study targeted Staff Lanyards as being a possible cause of cross-infection in Healthcare Facilities particularly if worn for long periods without cleaning.

But how do you clean a Lanyard?

Easily! If you are using a **NEW** Vinyl Lanyard from

- Vinyl Lanyards can be wiped down with water or disinfectant to prevent the risk of cross-infection. This should be done on a regular basis.
- Lanyards are fitted with 'Breakaway' clasps in accordance with good health and safety practice.
- Lanyards also contain two metal fittings for staff ID Cards and other items eg. Keys.
- Available in Blue, Red, Navy Blue, Green and Clear.

Also available:

- Food Safety Labels
