Enter client details into the provided fields.

Record and date of the client's consent to medication administration.

Date Photo Taken ___/___/___

Photo ID should be updated every 12 months- appearances can change markedly especially following a bout of illness or significant weight loss. Similarly, clients sharing similar names can be more easily recognised if an up to date photo is on a chart.

Record date photo taken to ensure photo ID is updated.

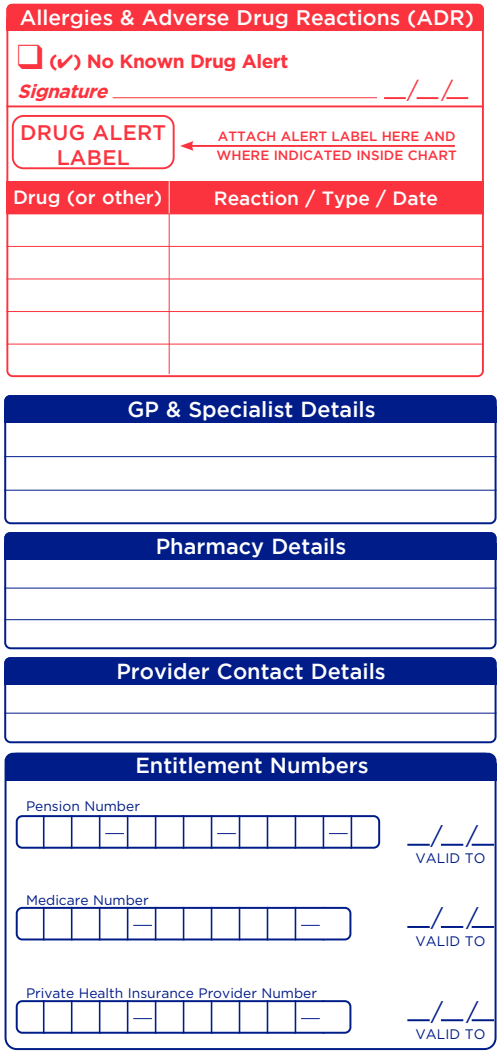
FRONT PAGE



This field MUST be completed for risk mitigation, or it may cause confusion on whether questions have been asked.

Drug alert label to be affixed where indicated throughout the chart to encourage staff to refer back to allergies and adverse drug reactions (ADR).

Imperative that this section is completed, otherwise it is left open to assumption. If possible include nature of reaction and the date as this may influence any further therapies depending on whether a true allergy or drug reaction.

Particularly useful for agency staff or new staff.

Special considerations identify clients special needs related to administration of medication. E.g. given with thickened fluids, given via PEG, medication to be crushed. All entries to be signed and dated.

Particularly useful for agency staff or new staff.

Important that this section is completed with the relevant information, as this may influence any further therapies including prescribing and other treatment plans.

Vaccination recording is important to assist with monitoring disease prevention.

MEDICATION COUNTS

Medication Counts

Date	Medication Name	Balance	Signature	Date	Medication Name	Balance	Signature

Six months' worth of daily, individual medication count entries. Particularly useful for staff when they are required to count the balance of medication stock daily at the beginning of each day at their client's house.

COMPACT™ SYSTEMS AUSTRALIA

MEDICINES RECEIVED REGISTER, MEDICINES REMOVED REGISTER

Medicines Received Register

(If the answer is no to any of the following questions: refer to your organisation's medication policy for guidance)

Date	Type of Medicine/s	Are all Medicines correct? Check Medicine Orders (Y/N)	Are the non packed medicines in date? (Y/N)	Are medicines noticeably in good condition? (Y/N)	Signature

A log to record the acceptance of packed and non-packed client's medications.

Medicines Removed Register

Date	Type of Medicine/s	Amount	Reason	Signature

A log to record the reason and removal of medications previously stored in the client's house.

Prescriber Review

Date	Signature

Pharmacy Review

Date	Signature

Important this information is completed at the time a prescriber or pharmacist reviews a client's medication chart.

Indicates that the client's medication list undergoes review during the use of current drug chart.

COMPACT™

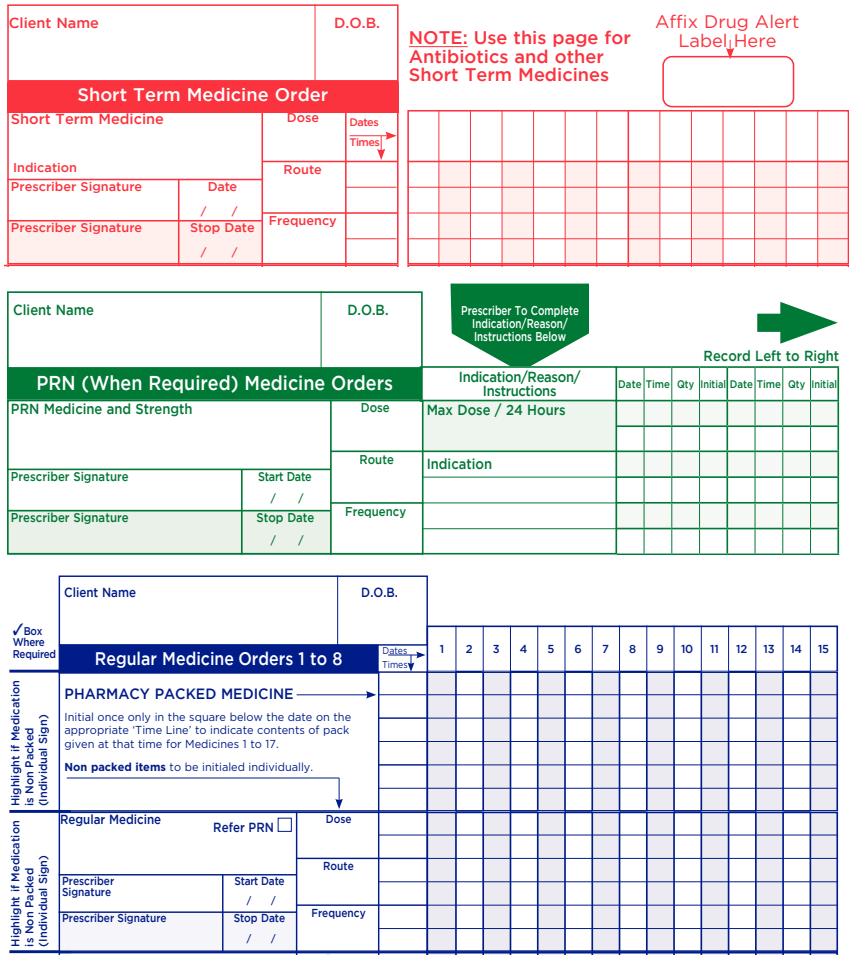
SAMPLE STAFF SIGNATURE AND INITIALS

Sample Staff Signature and Initials		
Staff Name	Signature	Initials

All staff that administer medications to the client and record this in the drug chart must complete.

COMPACT™
SYSTEMS AUSTRALIA

MEDICATION ORDERS



It is imperative that staff ensure medicine is swallowed prior to signing the Admin record.

The signature on the Admin record indicates the client has taken the medicine.

Staff must record any refusal to take medicines on the chart, and in the Progress Notes using the Dose Omitted Codes shown on the back of the drug chart. It is recommended that Dose Omitted Codes are written in RED pen.

The prescriber should also be notified of any refusal to take any medications.

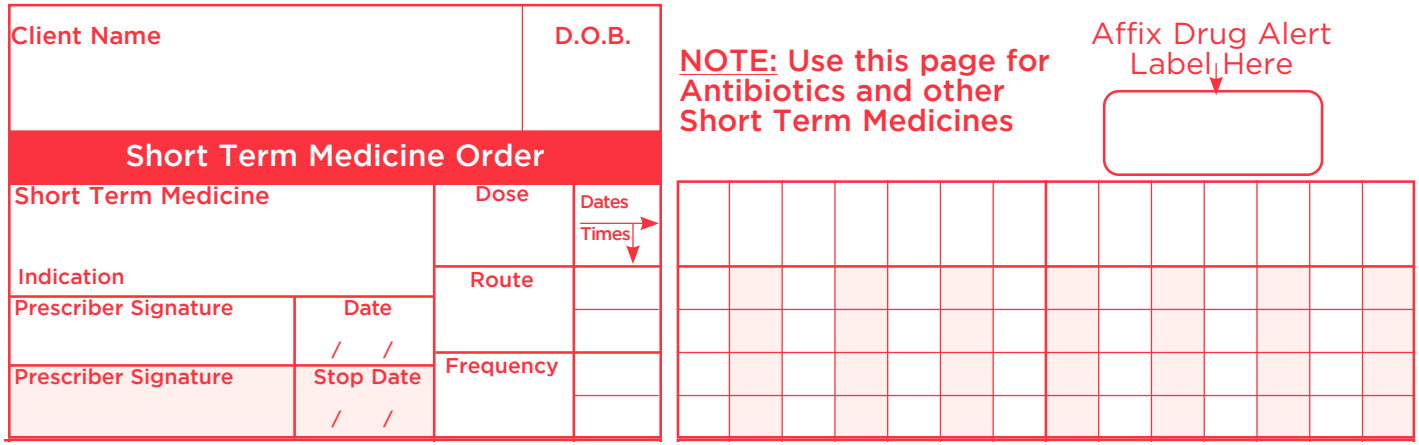
Any discrepancies or incidents related to medicines should be recorded on a medication Incident Report and forwarded to the appropriately delegated person in the organisation.

No medicine should be administered if Medication Chart has expired (this drug chart has a duration length of SIX months from chart start date).

COMPACT™
SYSTEMS AUSTRALIA

SHORT TERM/ANTIBIOTIC PAGE

Prescriber to write reason for the antibiotic next to the indication



Short Term Medicine Order chart is frequently misused by having regular drug orders written up. It is important during the implementation period to draw the Prescriber's attention to this. Also note there is now an indication section- recommended to be completed by best practice.

Short Term medicine order chart has same layout as regular medicine drug orders, however only **TWO weeks** of recording per drug order.

Supporting products:

- Auxiliary short term pages and quick clip
- Antibiotic bookmark prompts
- Clinical Review Needed bookmark prompts
- Ceased Stamp
- Ceased Labels
- Medicine Incident Report

Prescriber Signature / Start Date / /	Route	Indication									
Prescriber Signature / Stop Date / /	Frequency										2.
PRN Medicine and Strength	Dose	Max Dose / 24 Hours									
Prescriber Signature / Start Date / /	Route	Indication									
Prescriber Signature / Stop Date / /	Frequency										3.
PRN Medicine and Strength	Dose	Max Dose / 24 Hours									
Prescriber Signature / Start Date / /	Route	Indication									
Prescriber Signature / Stop Date / /	Frequency										4.
PRN Medicine and Strength	Dose	Max Dose / 24 Hours									
Prescriber Signature / Start Date / /	Route	Indication									
Prescriber Signature / Stop Date / /	Frequency										5.

It is important that the date, time, quantity and initial is completed each time a PRN medicine is administered.

Outcome of PRN medicine administration should be recorded

It is suggested the guidelines be established within each organisation for the conversion of PRN to regular drug orders once a certain usage has been recorded.

REGULAR MEDICINE ORDERS

The CDC01 Chart is designed for single and multi-dose (pharmacy packed) signing capabilities.

To achieve this:

- Pharmacy packed medications can be signed for once only against the designated time and date line throughout the chart.
- Single unit dose medications if required, can be signed for individually against the corresponding medication order, next to its designated time and date.
- This also applies to non-packed medications. Non-packed medications must be signed for individually against the corresponding medication order, next to its designated time and date.
- In the case of a regular medicines order and a PRN order for the same medicine, highlight and/or tick the box provided to prevent duplicating dose.
- Medicines must be signed for immediately after being given.
- Prescriber to rewrite medication order if it is not clear.

Highlight if Medication is Non Packed (Individual Sign)

There are fields next to each medication order to highlight if medicine is non-packed.

Supporting Products:

- Urgent re-write Bookmark
- Ceased stamp/Labels
- Medicine Incident Report
